## About This Content

Operations Pack brings 2 new missions and 2 new weapons for The Red Solstice.

Missions yield nice rewards for your squad when finished, and will momentarily change your approach to the current session. They will spawn randomly after wave 6.

### NEW MISSION - Rescue Civilians

Your squad is tasked with rescuing a random number of civilians that will be positioned randomly across the map. Once rescued you will need to lead the civilian group to EVAC point. Civilians are not tough, and any kind of friendly fire, even bullets, will hurt them, so watch your fire! Once the civilians are evacuated based on the number of civilians saved, equipment will be generated for your squad.

### NEW MISSION - M.E.R.C.S.

Your squad will receive a distress signal for a friendly squad. If you manage to reach them you will have to hold position until they are healed, fighting against few waves of tougher enemies. Once they are healed you will be tasked with escorting them to their designated position. While escorting the M.E.R.C.S. squad you will get ambushes and will have to hold position with them at certain areas of the map. Once escorted you will receive rewards.

-----

### NEW WEAPON - Light Vindicator

A weapon with high rate of fire but limited range which does energy damage. This weapon can be overcharged with a power

---

cell or the energize skill for a burst of 2000 plasma damage.

**NEW WEAPON - Assault Rifle with Flamethrower**

A weapon with reduced magazine size but A powerful attached flamethrower, it can be used in any situation, both for blocking out narrow passages, or long range with normal gar mode. Napalm stacks so the more flamethrowers you have focused at one creature, the stronger they burn.
